

Lighthouse

Info Systems Pvt. Ltd.

Mastering Complexity.
Maximizing Profitability

The Definitive ERP for International
Trade & Material Recycling.

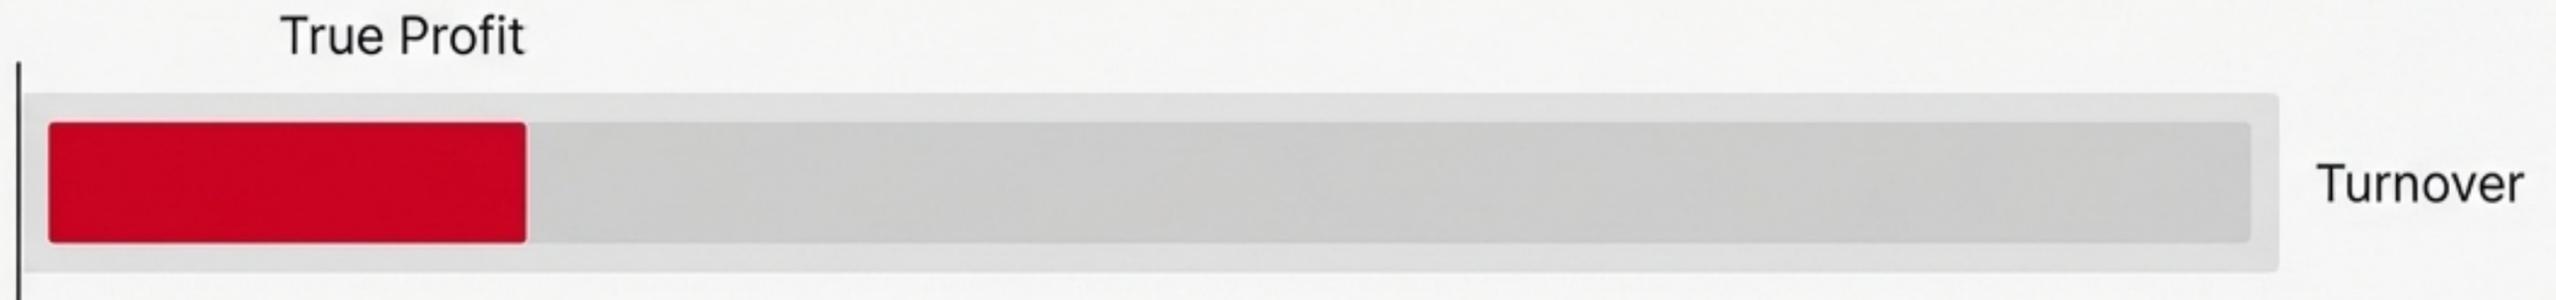

Lighthouse is a Business Management Systems Development house

The Core Dilemma in Commodity Trading

“Most trading businesses know turnover. Very few know true profit per contract in real time.”

The Battlefield: Your Daily Operational Challenges

Financial Volatility

- Price volatility & margin uncertainty
- Multi-currency purchases & forex exposure

Logistical Complexity

- Complex landed cost calculations
- Managing inventory across ports, warehouses, and in-transit

Compliance & Risk

- Intricate import compliance (B/L, LC, Customs, GST)
- Risk of contract vs. actual cost mismatches

Data Fragmentation

- Reliance on manual, error-prone Excel-based tracking
- Delayed profitability visibility

Introducing Lighthouse ERP: Your Command Center for Global Trade

Lighthouse ERP™

38+ Years

of Industry
Experience

500+

Successful
ERP Projects

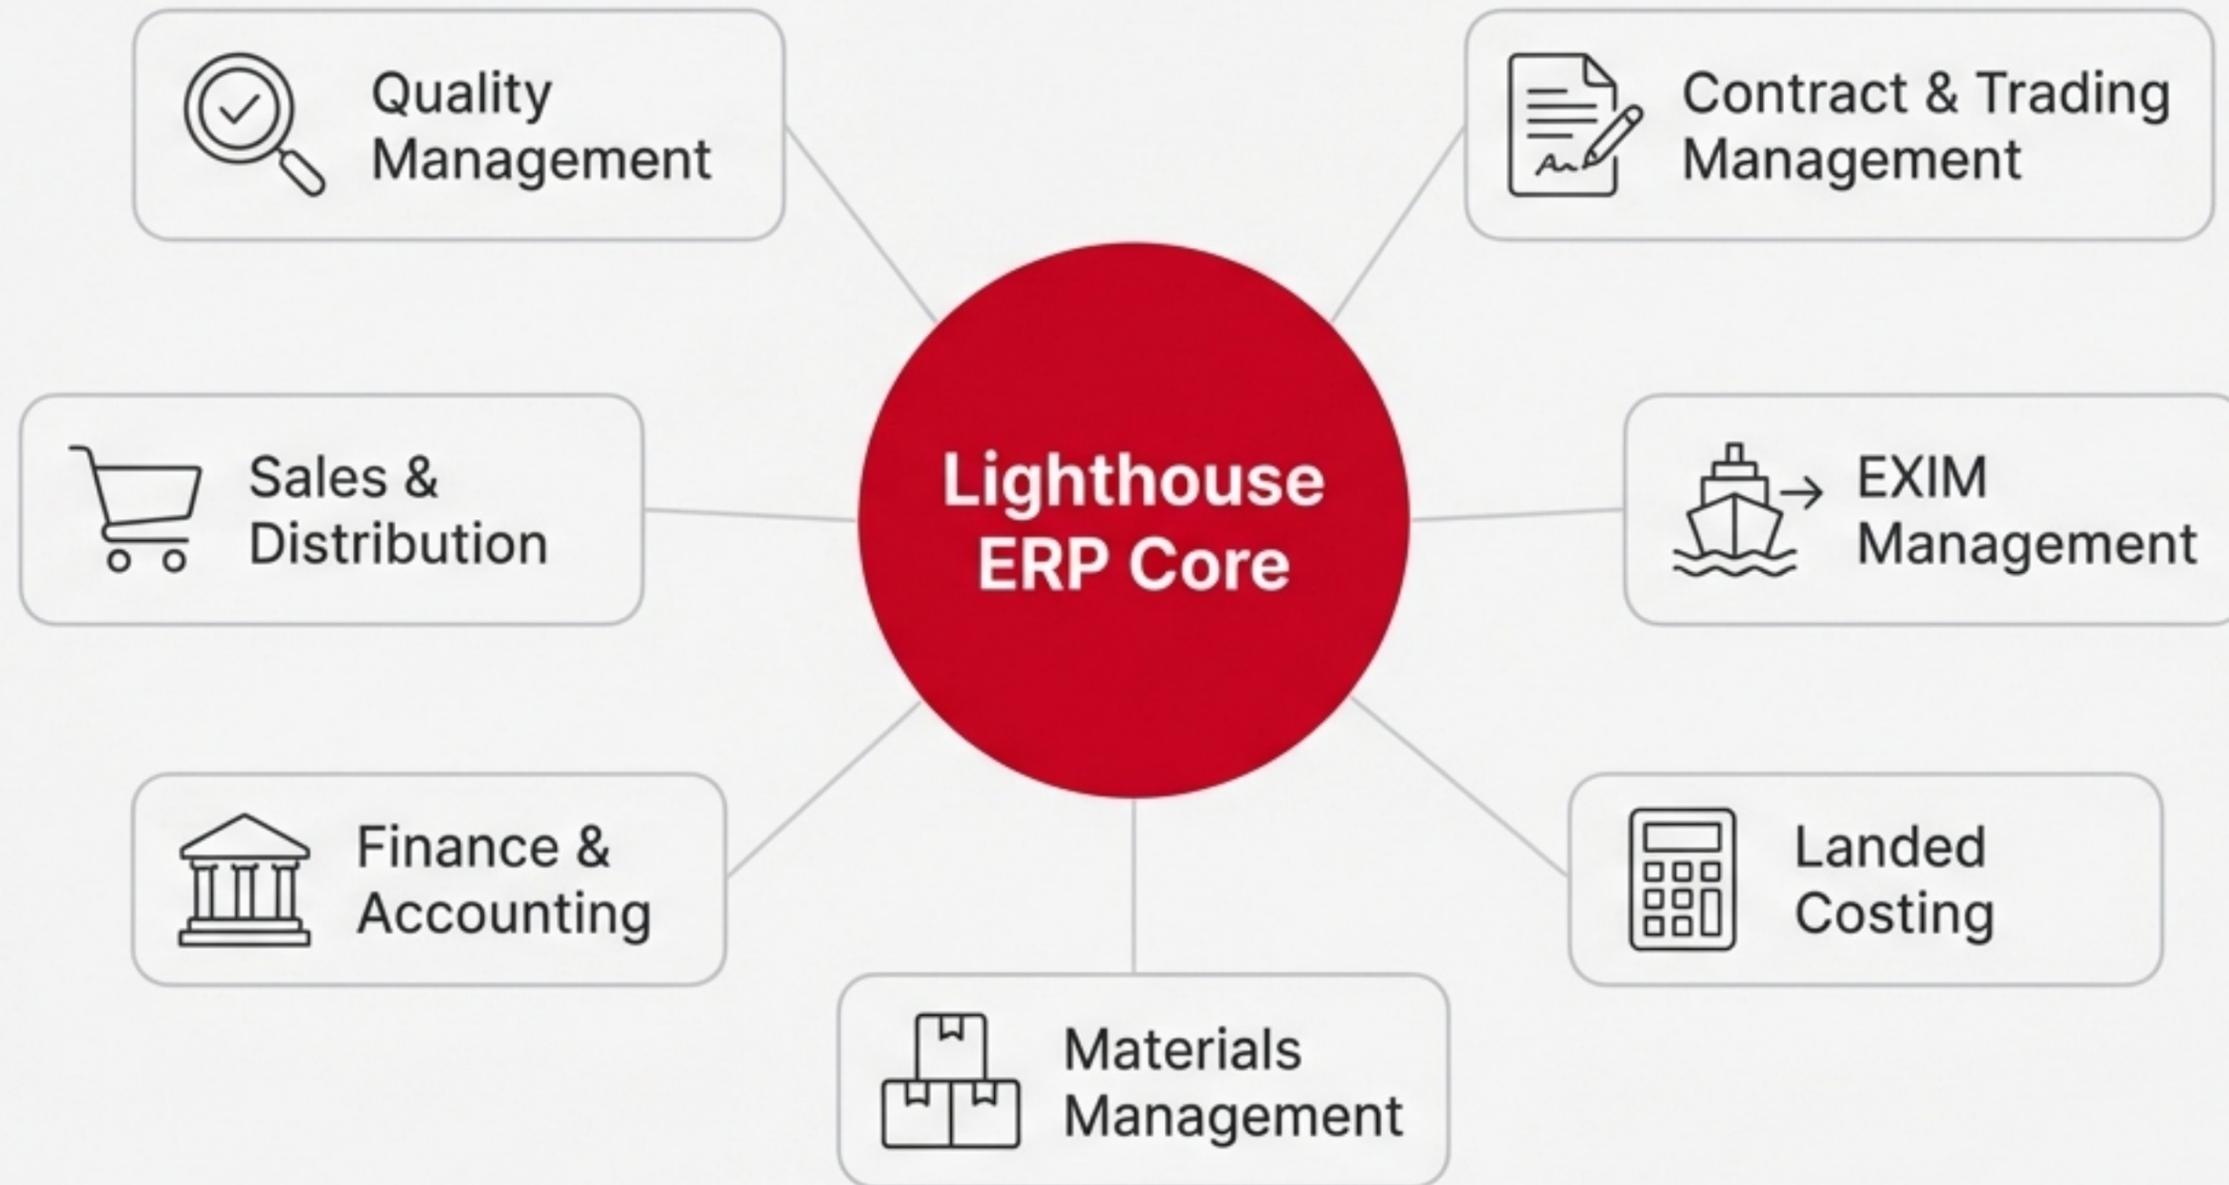

1000+

Business
Entities Served

Powered by

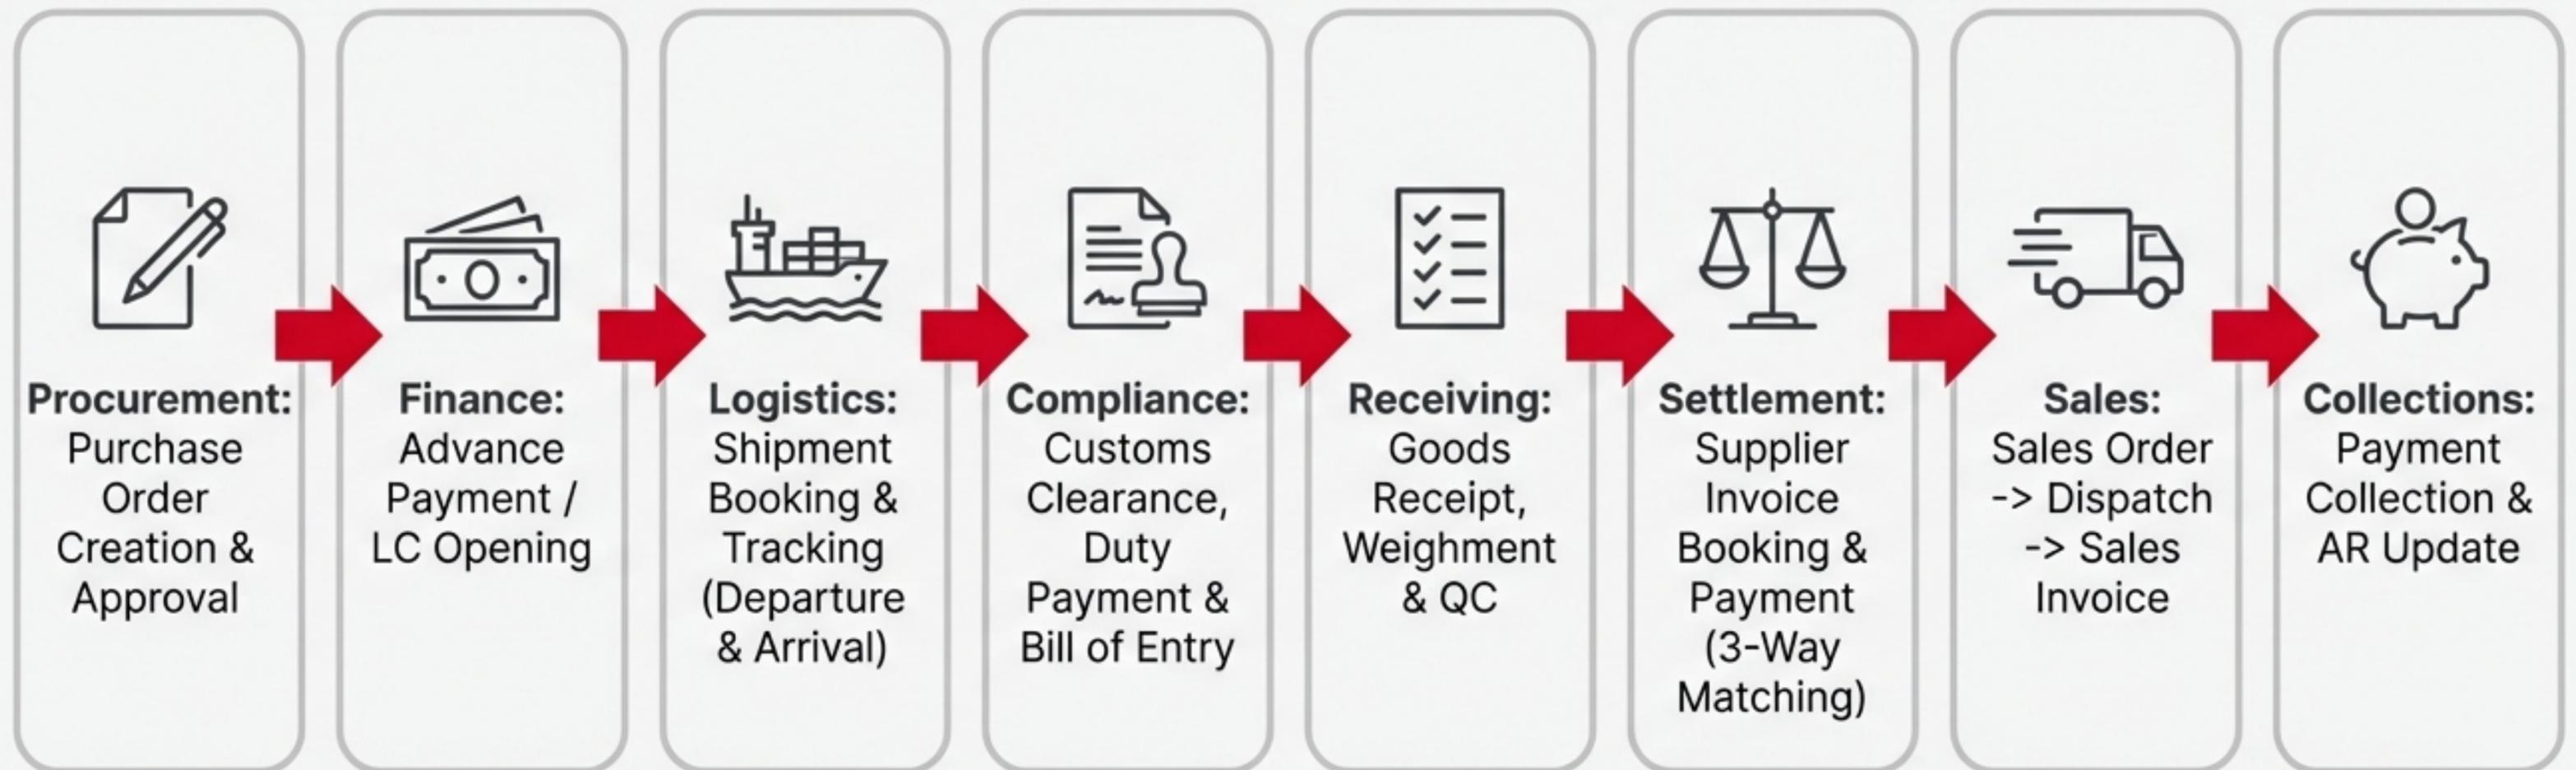

ORACLE®

A Fully Integrated Suite for End-to-End Control

Also includes: Freight Management, Broker Management, and Insurance Management.

From Contract to Cash: A Seamless, Visible Workflow

Gain Precision Over Your Contracts and Costs

Contract & Trading Management

- Manage complex purchase and sales contracts.
- Handle price fixation and provisional pricing.
- Track quantity tolerance and shipments against contracts.
- Achieve real-time, order-wise profitability analysis.

Landed Costing Management

- Allocate all import/export expenses (Customs duty, IGST, Port charges) to each consignment.
- Automate cost re-calculation upon finalization.
- Ensure accurate inventory valuation.
- Link sales pricing directly to true landed costs.

Navigate Complex Logistics and Compliance with Confidence

Import, Compliance & Logistics

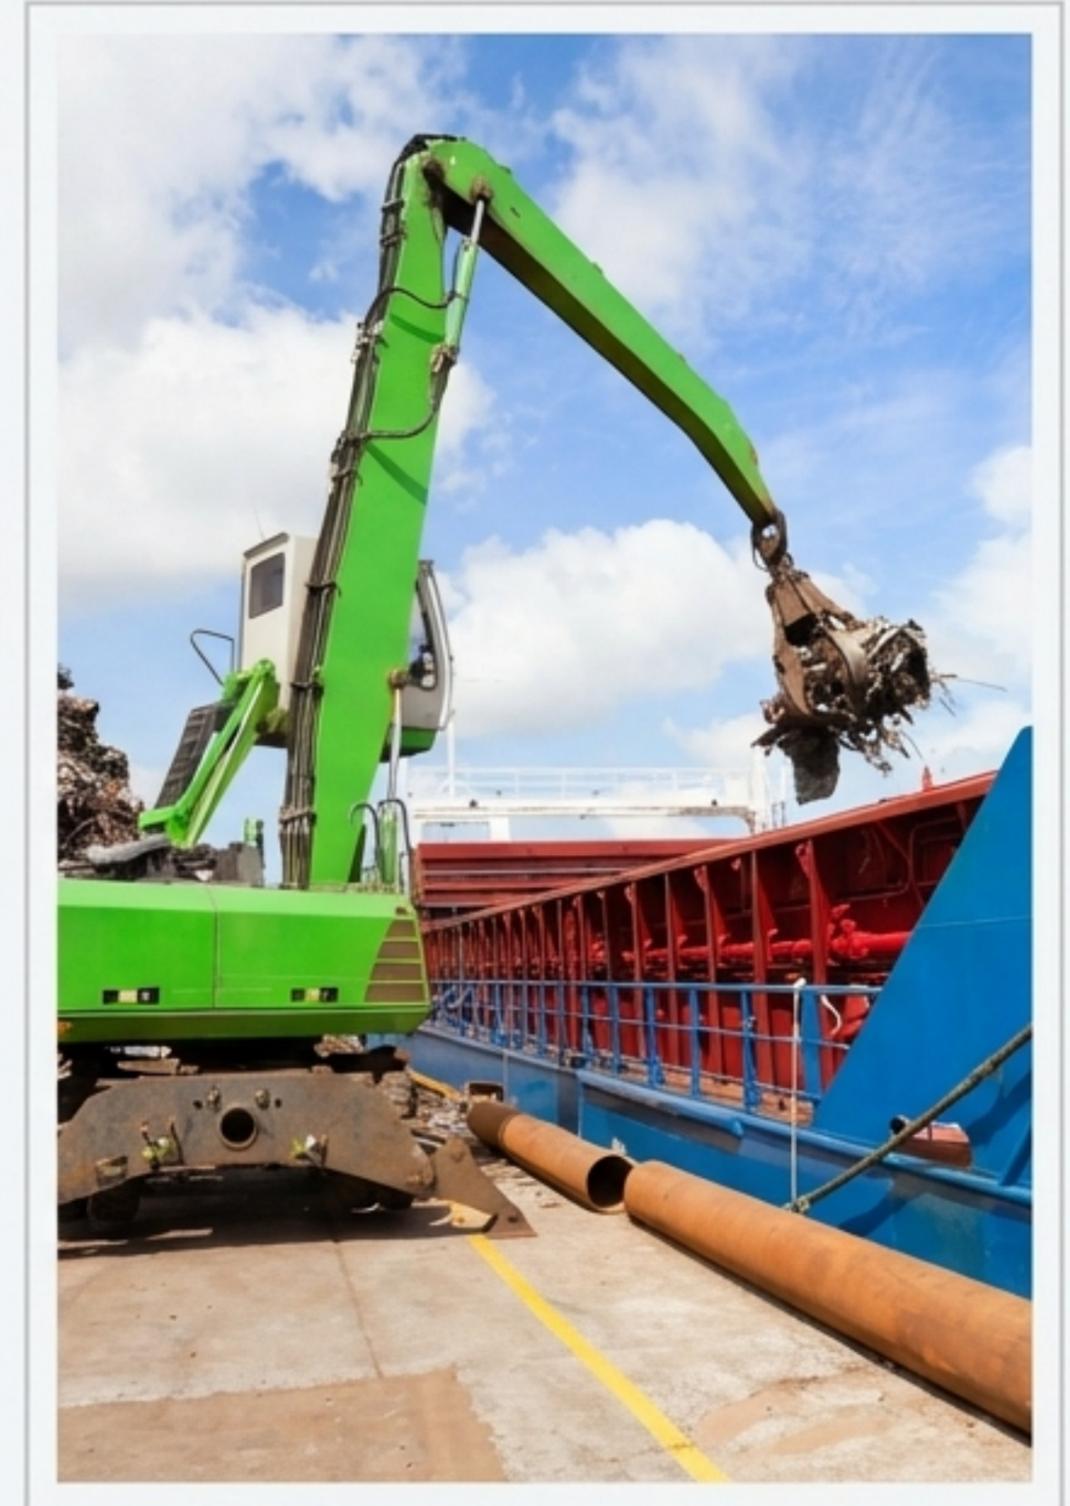

- End-to-end Letter of Credit (LC) management and amendment tracking.
- Manage Bill of Lading and other pre/post shipment documents.
- Track DEPB and other advance licenses.
- Handle High-Seas sales and vessel-wise costing.

Multi-Location Inventory Control

- Real-time visibility of stock at ports, in-transit, and warehouses.
- Full batch and lot tracking capabilities.
- Integrate with Security Gate and Weighbridge systems.
- Manage quality and weight variance handling upon receipt.

Purpose-Built for the Demands of Material Recycling

- **Material Reconciliation:** Track discrepancies in weight and quality from source to receipt.
- **Bill of Materials (BOM):** Manage material mix and recipes for processing.
- **Yield Management:** Accurately calculate raw material to final product yield.
- **Stock Handling:** Manage finished goods inventory post-processing.

From High-Stakes Challenges to a Decisive Competitive Edge

Challenge	Lighthouse Advantage
Margin uncertainty & delayed visibility	Real-time margin visibility per contract.
Complex, hidden landed costs	Reduced cost leakages with accurate allocation.
Manual compliance & logistics tracking	Faster import clearance cycles.
Tied-up cash in inventory & receivables	Better working capital control.
Inconsistent, unreliable data	Audit-ready compliance and management confidence in numbers.

Real-Time Intelligence for Confident Decisions

- ✓ Access a single source of truth with unified business intelligence (BI) dashboards.
- ✓ Drill down from high-level KPIs to the details of a single consignment.
- ✓ Monitor financial health, from forex exposure to profitability by commodity, contract, and customer.

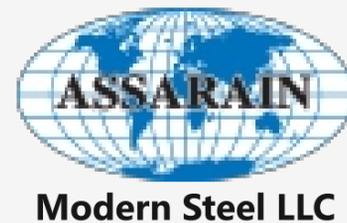

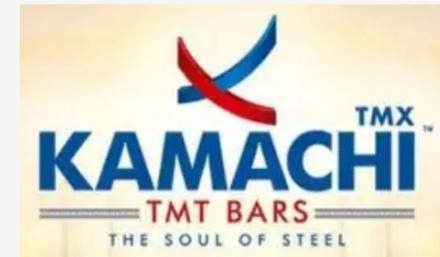

A Game-Changer for Our Operations

“ Implementing this ERP solution has been a game-changer for our manufacturing operations. The integration of our various processes has significantly improved efficiency and accuracy. We now have real-time insights into our inventory, production schedules, and financials, which has streamlined decision-making and boosted overall productivity.

”
