

# CASE STUDY

## Shyama Power Ltd.

### Business Challenge

To capitalize on opportunities offered by the growing Indian economy, SIPS wanted to build a more integrated enterprise that would enable greater workforce productivity and control over costs.

### Thriving in an era of possibility

India's population and the economy, in recent years has emerged as one of the largest producers of electricity across the world. The government on State and Central level invests heavily in power generation, Transmission and Distribution activities and initiatives.

### Benefits

- » 15 percent revenue increase is estimated for the next financial year
- » 6 percent approximate reductions in costs already achieved through greater inventory control and efficiencies
- » Powering unprecedented integration

Today, all the company's processes, from procurement through to final delivery on a project, are connected and transparent. Helping employees work and collaborate more effectively, the solutions are contributing to greater productivity.

"Working with Lighthouse, we have evolved into a more integrated, agile enterprise that can make better choices based on timely data."

*Mayank Jain, Director, SPL.*
