

CASE STUDY

Shah Nanji Nagasi Ltd.

Overview

Shah Nanji Nagasi leveraged Lighthouse ERP to optimize processes and integrate management, enabling the company to pursue its ambitious growth targets for 2020.

Objectives

- » Used baseline methodology to speed deployment
- » Optimization of processes

Benefits

A number of practical benefits have resulted from the deployment of Lighthouse ERP, including:

- » Optimization of processes
- » Faster financial closing
- » Removal of data inconsistency in the financial closing process
- » More capability for and time to perform data analysis

“In order to achieve this target, we needed to replace the old corporate management system for a more powerful and state-of-the-art solution.”

Ashwin Shah , Director , SNN.

“The availability of management reports in real time allows us to have quick access to relevant information, thus giving our managers more time to work and focus on strategic matters for the company.”

AJavan Shah, SNN.
