

CASE STUDY

SSPL

Strategy Starts on the Shop Floor

SSPL inhouse excel based planning activity wasn't helping them in utilizing their production capacity with their raw material inventory or manage customer demand.

Ready for Action

SSPL was looking to get better control of shop floor operations, and with ready acceptance in the industry for Lighthouse ERP for Discrete Manufacturing, ERP for Nuts & Bolts Manufacturing looked like the next important step.

Turning Data into Results

Having upgraded to Lighthouse ERP for Transmission Industry fasteners, the solution has comprehensive process coverage quoting, planning, producing and dispatching of products of different sizes and application type.

Seeing the Big Picture

Since automating shop floor confirmation, SSPL enjoys 99% accuracy on quantity and work-in-progress inputs.

A Winning Team

The integrated Oracle based Lighthouse ERP solution at SSPL has changed the entire corporate culture and streamlined the balance of work throughout the company.

Way to the Future

There's often a lack of faith in systems used between front offices and shop floors. The integration among Lighthouse ERP and other production management solutions has led the employees feel like they are part of the team.
